Sell smarter. Reach further. Grow together.

Seller Training Guide

Everything you need to open your store, add products, take orders and get paid — step by step, on your phone.

1. Log in & create your account	p.3
2. Sign the seller agreement	p.3
3. Set up your store	p.4
4. Add a product	p.4
5. Edit a product	p.5
6. Manage stock (inventory)	p.5
7. Share your store	p.6
8. Receive & update an order	p.6
9. Message your buyer	p.7
10. Get paid & platform fees	p.7
11. What your customer sees	p.8

BEFORE YOU START — WHAT YOU NEED

- A smartphone with internet (this works right in your web browser — no app store needed).
- Your **phone number** to receive a sign-in code by SMS.
- A few clear **product photos** and your prices.
- Your **bank details** if you want buyers to pay by EFT.

1 Log in & create your account

1. Open **yebosell.co.za** and tap **Seller Login** (top-right menu on your phone).
2. Enter your **phone number** and tap continue. We send you a **code by SMS**.
3. Type the code, then **choose a 4-digit PIN**. The PIN unlocks the app quickly next time — no SMS needed.
4. Forgot your PIN later? Tap **“Forgot PIN”** and we'll text you a new code.

Tip: your phone number is your login. Use the same number every time.

SCREENSHOT 1

The Seller Login screen with the phone-number field and “Send code” button.

2 Sign the seller agreement

1. The first time you log in, the **Seller Agreement** appears. It explains the 5% platform fee and that YeboSell never holds your money — buyers pay you directly.
2. Type your **full name** and your **place of signing** (e.g. Maseru), tick the box, and tap **Sign & Continue**.
3. A **signed PDF** downloads to your phone automatically. You can re-download it any time from **Settings**.

Tip: typing your name is your electronic signature — it's a real agreement, so read it once.

SCREENSHOT 2

The Seller Agreement pop-up showing the name + place fields and the “Sign & Continue” button.

3 Set up your store

1. Go to **Settings**. Add your **business name**, a short description, and your **logo**.
2. Add your **pickup address** (if buyers can collect) and your **delivery fee** if you deliver.
3. Under **bank details**, add the account(s) buyers should pay into by EFT — you can add more than one.
4. Tap **Save**.

Tip: a logo and a clear store name make buyers trust you faster.

SCREENSHOT 3

The Settings screen showing Profile & Store and the bank-details section.

4 Add a product

1. Open **Products** and tap **Add Product**.
2. Enter the **name**, **price** and **stock**, and add a clear **photo**.
3. Need sizes or colours? Add **variants** — each with its own stock.
4. Set a **prep time** (days to get ready) so buyers see a delivery estimate. Tap **Save**.

Tip: bright, well-lit photos on a plain background sell best.

SCREENSHOT 4

The Add Product pop-up with name, price, photo, stock and variant fields.

5 Edit a product

1. In **Products**, tap the product you want to change — its details pop up.
2. Tap **Edit**, change the price, photo, description or stock, and tap **Save**.
3. To hide a product without deleting it, switch it to **inactive**. To remove it for good, tap **Delete**.

Tip: keep prices current — buyers pay the price shown at checkout.

SCREENSHOT 5

A product's pop-up card with the **EDIT** button visible.

6 Manage stock (inventory)

1. Open **Inventory** to see every product's stock at a glance.
2. Low-stock items are flagged so you can restock before you sell out.
3. Update a count directly, or edit the product. Stock **drops automatically** when a buyer orders.

Tip: accurate stock avoids selling something you don't have.

SCREENSHOT 6

The Inventory screen with stock counts and a low-stock flag.

7 Share your store

1. Tap **Visit** (or copy your store link) to open your storefront.
2. Share that link on **WhatsApp status, Facebook and Instagram**, or send it to a customer directly.
3. Anyone who opens the link can browse your products and place an order — no app needed.

Tip: pin your store link to your WhatsApp “About” and social bios.

SCREENSHOT 7

Your live storefront with product cards and the store name at the top.

8 Receive & update an order

1. When a buyer orders, you get a **notification** (turn on alerts when asked). Open **Orders**.
2. Tap the order to see items, the customer and delivery details.
3. Move it along the stages: **New** → **Confirmed** → **Preparing** → **Ready / Out for delivery** → **Delivered**.
4. If you need more time, update the delivery timeline — the buyer is told automatically (a reason is required).

Tip: confirm new orders quickly — buyers love a fast first response.

SCREENSHOT 8

An open order showing the status steps and the update controls.

9 Message your buyer

1. Inside an order, use the **chat** to message the buyer — they see it on their tracking page and by notification.
2. Prefer WhatsApp? Tap **Message on WhatsApp** to open a chat with a ready-made note from your own number.
3. Buyers can reply, send a payment proof, or ask questions — it all stays on the order.

Tip: keep it friendly and clear — good service brings repeat orders.

SCREENSHOT 9

The order chat thread with the “Message on WhatsApp” button.

10 Get paid & platform fees

1. Buyers pay **you** directly — by EFT to your bank details, or cash on collection/delivery.
2. Once paid, mark the order **Paid**. The buyer follows everything on their tracking link.
3. YeboSell charges a **5% platform fee** per paid order (goods only). Your balance shows on the **YeboSell Account** card on your Dashboard; settle it when asked.

Tip: YeboSell never touches your money — the fee is billed separately, not deducted from sales.

SCREENSHOT 10

The Dashboard “YeboSell Account” card showing the fee balance.

11 What your customer sees

1. Your customer opens your **store link**, adds items to a cart and checks out — entering their name, phone and delivery choice.
2. They agree to the buyer terms and place the order. They get a **tracking link** they can save to their phone.
3. From that link they follow the order status, chat with you, see your bank details, and can cancel before you dispatch.

Tip: encourage buyers to “Add to Home Screen” so they get order updates.

SCREENSHOT 11

The buyer's order-tracking page with the status timeline.

NEED HELP DURING THE TEST?

- Chat with YeboSell on WhatsApp: **+266 5729 9369** — we're here to help you make your first sale.
- Read the full terms any time at **yebosell.co.za/terms**.
- Tell us what's confusing or missing — your feedback shapes the app.
